Average monthly revenue per unit, or ARPU, is used to measure average monthly operating revenues attributable to each designated service on a per user basis. In the case of NTT Group's integrated ICT business, ARPU is calculated by dividing revenue items included in operating revenues from its integrated ICT business segment, such as revenues from its integrated ICT business segment, such as revenues from its integrated ICT business segment, such as revenues from its integrated ICT business segment, such as revenues from its integrated ICT business segment, such as revenues from its integrated ICT business segment, such as revenues from its integrated ICT business segment, such as revenues from its integrated ICT business segment, such as revenues from its integrated ICT business segment, such as revenues from its integrated ICT business segment, such as revenues from its integrated ICT business segment, such as revenues from its integrated ICT business segment, such as revenues from its integrated ICT business segment, such as revenues from its integrated ICT business segment, such as revenues from its integrated ICT business segment, such as revenues from its integrated ICT business segment, such as revenues from its integrated ICT business segment, such as revenues from its integrated ICT business segment, such as revenues from its integrated ICT business segment in the case of the integrated ICT business segment in the case of the integrated ICT business segment in the case of the integrated ICT business segment in the case of the integrated ICT business segment in the case of the integrated ICT business segment in the case of the integrated ICT business segment in the case of the integrated ICT business segment in the case of the integrated ICT business segment in the case of the integrated ICT business segment in the case of the integrated ICT business segment in the case of the integrated ICT business segment in the case of the integrated ICT business segment in the case of the integrated ICT business se phone services and FOMA (3G) mobile phone, that are incurred consistently each month, by the number of active users to the relevant services. In the case of NTT Group's regional communications business segment, that is, fixed-line (telephone subscriber lines and INS-NET) and FLET'S Hillari, by the number of active subscribers to the relevant services. The calculation of these figures excludes revenues that are not representative of monthly average usage, such as telecommunications equipment sales, activation fees and universal service charges. NTT believes that its ARPU figures calculated in this way provide useful information regarding the monthly average usage of its subscribers. The revenue items included in the numerators of NTT Group's ARPU figures are based on its financial results comprising its IFRS results of operations.

- (2) モバイル通信ARPUの計算式は、以下のとおりです。/ The following is the formula we use to compute Mobile Communications ARPU.
 - ・モバイル通信ARPU: モバイル通信ARPU関連収入(基本使用料、通話料、通信料)/稼動利用者数
 - Mobile Communications ARPU: Mobile Communications ARPU-related revenues (basic monthly charges, voice communication charges, packet communication charges) / No. of active users
- (3) NTTドコモにおけるARPU算出時の稼動利用者数の計算式は以下のとおりです。/ Numbers of active users used in the ARPU calculation of NTT DOCOMO are as described below.
 - 当該期間の各月稼動利用者数 { (前月末利用者数+当月末利用者数) /2} の合計
- Sum of No. of active users for each month {(No. of users at the end of previous month + No. of users at the end of current month) / 2} during the relevant period
- (4) 利用者数は、以下のどおり、契約の数を基本というつ、一定の契約の数を除分して順定しています。 / The number of "users" used to calculate ARPU is the total number of subscriptions, excluding the subscriptions listed below:
